

# **Data Science Trainee**

**Astha Nishad: 31/10/2021**

I've been learning Classical Machine Learning with Data Science at @Decodr Technologies

Today I attended the session where I learnt

Overviews And Basics of Python

Here's the summary of what I learned today:

1. It was pretty much interesting to make code specially on Syntax, strings Variables, Types etc.
2. Coding on Jupyter Notebook and google colab is very simple other than C Programming, Fortran etc.
3. I learned specific python programming rules today.
